Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1** **Explore Data**	**Stage 2** **Analyze Insights**	**Stage 3** **Take Decisions**
Actions *What does the customer do?*	• Opens the EV market dashboard • Reviews KPI cards: sales, rating, range • Applies filters to explore	• Compares sales, range and ratings by category • Checks top manufacturers and market share • Studies battery and range	• Notes segments and batteries to target • Exports the dashboard as image or PDF • Shares with leadership
Touchpoint *What part of the service do they interact with?*	• Dashboard title and KPI cards • Filter panel (year, category, battery) • Tableau workbook or published link	• Bar, treemap, pie and heat-map visuals • Country map and scatter plot • Tooltips and click-to-filter actions	• Export Image / PDF option • Report or presentation slides • Email or meeting with decision makers
Customer Thought *What is the customer thinking?*	• “Where should I start?” • “Can I trust these numbers?” • “I need a quick overall picture.”	• “Which categories sell the most?” • “Which battery type leads?” • “Are these differences meaningful?”	• “What should we invest in?” • “Can I explain this simply?” • “Is this enough to decide?”
Customer Feeling *What is the customer feeling?*	Curious, but slightly overwhelmed by the amount of data (300K records).	Engaged, and gaining clarity as the visuals reveal patterns.	Confident and satisfied with clear, data-backed insights.

Process Ownership *Who is in the lead on this?*	BI / Data team (data preparation and dashboard setup)	Business analysts: Strategy Director, BI Manager, Research Analyst	Market Strategy Director (decision owner)
Opportunities *How can we improve this stage?*	• Add a short guided tour or help text • Show a one-line summary above the KPIs • Set sensible default filters	• Add drill-down from category to model • Highlight key insights with annotations • Add benchmark and average reference lines	• Offer one-click PDF export • Auto-generate insight summaries • Schedule data refresh and alerts
