Scalability & Future Plan

Date	2 November 2026
Team ID	XXXXXX
Project Name	Global EV Market Intelligence Dashboard
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Data is synthetic and static (CSV files), with no live feed.	Insights may not match the real EV market.	High
2	V2 and V3 use a separate data source, so dashboard filters do not change them.	Interaction is inconsistent across visuals.	Medium
3	Data preparation is manual and the workbook is public on Tableau Public.	Slow refresh and no private sharing.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Published on Tableau Public (public link, one workbook).	Move to Tableau Cloud or Server with user access control if the audience grows.
2	Data Storage	CSV and Excel files; extract of 45,478 aggregated rows.	Move to a cloud warehouse (for example Snowflake) with scheduled refresh.
3	Performance	Pre-aggregated extract keeps the dashboard light.	Keep aggregation in warehouse views and use incremental extract refresh.
4	Security	Synthetic data only; Tableau Public data is visible to anyone.	Use private hosting, role-based access and row-level security for real data.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact

Phase 2	Make every visual respond to the filters by joining manufacturer data to the main model; add V8 and V9 legends and a top-5 category view.	Short term	Consistent filtering and clearer charts.
Phase 3	Build an automated pipeline into a warehouse with scheduled refresh, using real EV market data.	Medium term	Reliable, up-to-date insights.
Phase 4	Add sales forecasting by category and battery type, private hosting and mobile layouts.	Long term	Better planning and secure sharing.
